

Communicable Diseases

Malaria Treated Cases

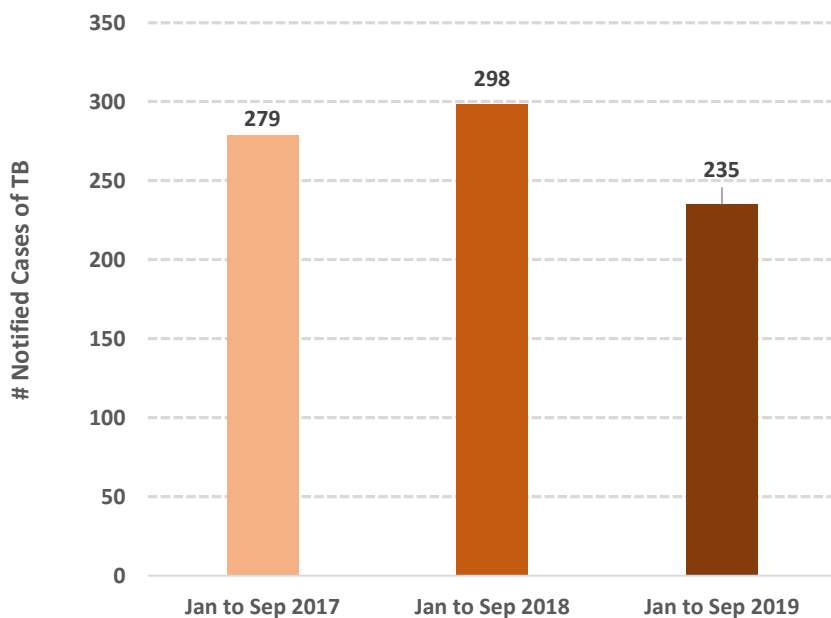

Source: DHIS2

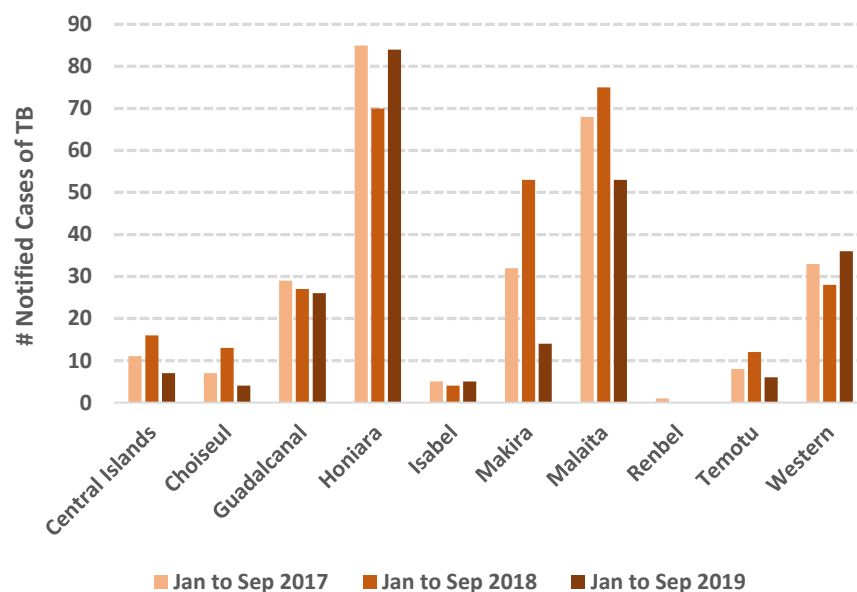

Source: DHIS2

An increase in the total number of cases treated for malaria is observed in the 3rd quarter of 2019, compared to the same period of 2018. The increase was evident across the provinces, in particular Guadalcanal, Honiara, and Temotu. A mass reduction observed in the number of cases treated for malaria at Central province could largely due to the delay in data input of MCMR.

Tuberculosis

Source: DHIS2

Source: DHIS2

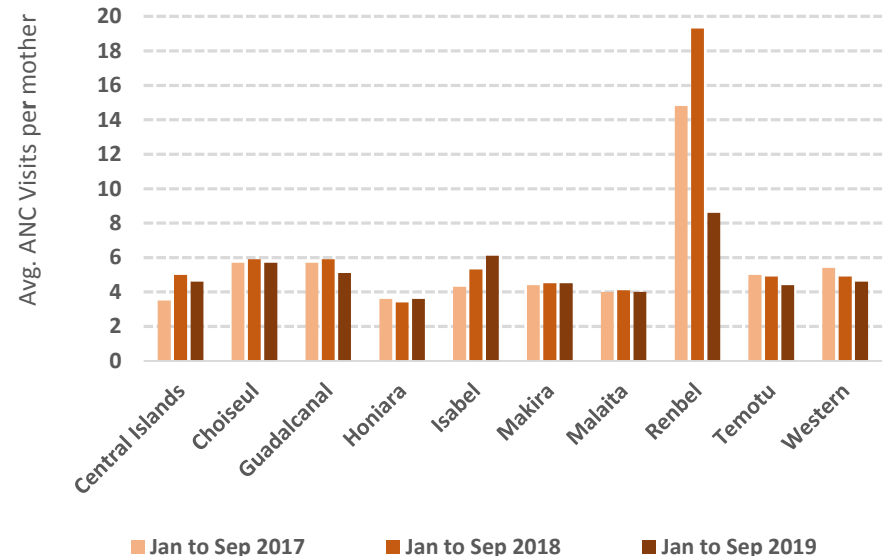

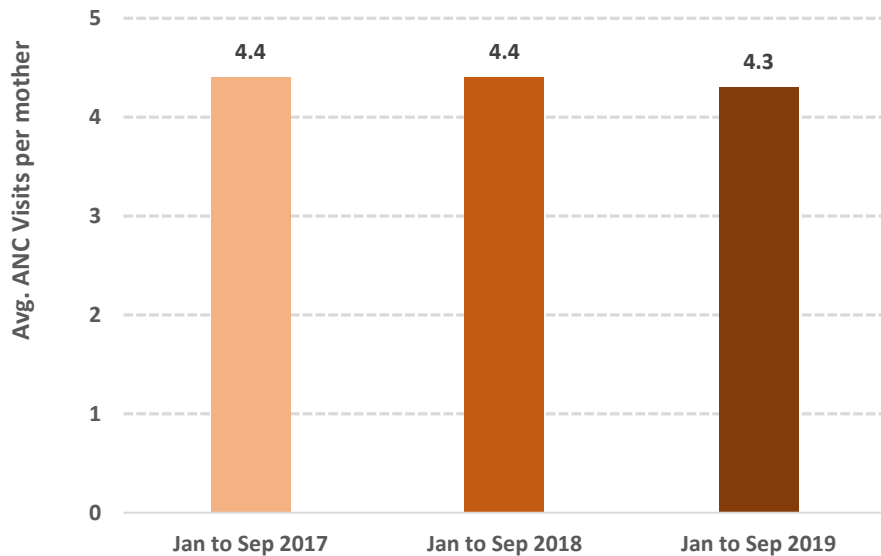

The number of notified cases of TB has declined in the 3rd quarter of 2019, compared to the same period of 2018. This was evident in all provinces except Honiara, Isabel and Western provinces. A mass reduction was also observed in the number of notified TB cases in Makira in the 3rd quarter of 2019.
