## Preface

This report provides basic table information to the analytical report (*2019 National Population and Housing Census National Report (Volume 1)*) of the 2019 Population and Housing Census of Solomon Islands. The data presented is referenced to the census date of the midnight of the 24<sup>th</sup> of November 2019. It is anticipated that the extended statistical information contained in this report will further inform, not only the wider community, but decision-makers in various capacities in the Solomon Islands.

The report is presented in two parts. Part 1, presents the statistical tables (person tables and household tables) itemizing the data provided in the analytical report. Part 2 provides a summary of the operations of the 2019 Census and Part 3 contains the appendices. It is noted that additional information on the population projections will be provided separately through an excel file that will be uploaded on the SINSO website.

While the set of tables presented here adheres to the United Nations Principles and Recommendations for Population and Housing Censuses, and where there is continuity in maintaining formatting standards of comparability with the previous censuses, caution should be considered in any direct or explicit comparisons on specific variables amongst past censuses noting certain changes in operations, definitions, and methods over time.

Although there may have been slight changes to the numbering and ordering of the tables corresponding to each subject matter grouping, as well as situations where the titles may have changed due to the structure and the formatting specifications, it is important to note that the table numberings relating to the categorizing of persons and households correspond to the respective chapters in the volume 1 report.

The tireless efforts of a number of people and agencies towards the successful implementation of the 2019 Census enumeration and the final release of the key findings through the analytical report and this report are acknowledged. Firstly, the government of Solomon Islands is acknowledged through the Minister of Finance and Treasury (MOFT), Honorable Harry Kuma for his leadership and support in terms of funding for the 2019 Census operation, and Mr McKinnie Dentana, Permanent Secretary for MOFT for his leadership and management oversight of the census operations at the ministry level.

Dr. Michael Levins and Jomer Manongsong are commended for technical advice on data processing and training, and Mr. Joshua Neale, Data Analyst under the New Zealand Volunteer (VSA) Programme for his assistance in data processing and data analysis. Mr. Douglas Kimi is also credited for his leadership and chairmanship of the Census Users Committee that comprised of members of key government ministries who contributed in the design of the questionnaire. Moreover, special appreciation is conveyed to Dr. Willie Lahari, MOFT-SINSO Technical Adviser for his technical assistance and capacity building in the planning and design, and implementation of the 2019 census enumeration, and the analysis of the data.

Sincere thanks also go to the following donors by share of grant funding support: to our Solomon Island Government (SIG) for being the main provider of funding support for the 2019 Census Project with grant financing (93.2%); Republic of China (ROC-Taiwan (4.9%); Central Bank of Solomon Islands (0.2%); R-Wash (1.2%), Ministry of Health and Medical Services; and UNICEF,(0.5%), Their financial assistance has tremendously supported the activities of the 2019 Census Project of the Solomon Island. Details of the 2019 Census budget is provided in Appendix 2.

Further words of commendations are conveyed to the Census Provincial Coordinators namely, Loyce Pabulu, Elleni Taisia, Anna Pitaboe, Clera Sao'hu, Alfred Palo, Josephat Tako, Desmond Papage, Joy Talo Mazini, Anterlyn Tuzakana, Reginald Mara, Hilda Diudi, and Michael Dimola, Late Raphael Aipaina and NSDS Staff are also thanked for their valuable contributions rendered to the success of 2019 Census.

The Solomon Island National Statistics Office (SINSO) and Census Management further expresses its appreciation to all the Census Project staff and the rest of the staff of the SINSO including Michael Dimola for his leadership in census logistics and management, Samson Kanamoli for support in GIS/Mapping and oversight over data processing, and Reginald Mara for support provided in data processing. The support from the Provincial Governments during the census enumeration is also appreciated including all the hard work undertaken by the Census District Supervisors, Chief Area Managers, Area Managers, Supervisors and Enumerators and Trainers.

The SINSO is also grateful to the following media outlets: SINSO Media, Solomon Islands Broadcasting Cooperation (SIBC), Solomon Star Newspaper and Island Sun Newspaper for the publicity programs since the initial stage of conducting 2019 Census.

Finally, let me salute the people of Solomon Islands including families, households and expatriate residents who participated in the 2019 Census enumeration, for availing their time to answer the questions asked and in cooperating with the enumerators during interviews. Your contributions have contributed to the success of the 2019 Population and Housing Census for the Solomon Islands.

A handwritten signature in black ink, appearing to read 'Douglas Kimi', written in a cursive style.

**Douglas Kimi**  
**Census Commissioner and Government Statistician**

## LIST OF ABBREVIATIONS

AM	Area Manager
CA	Census Act (cap 53)
CBSI	Central Bank of Solomon Island
CAPI	Computer Assisted Personal Interview
CAM	Chief Area Manager
CC	Census Commissioner
CDS	Census District Superintendent
CDF	Constituency Development Fund
CO	Census Office
CSC	Census Steering Committee
CTA	Census Technical Advisor
CTC	Census Technical Committee
CUC	Census Users Committee
DGS	Deputy Government Statistician
DHS	Demographics Health Survey
EA	Enumeration Area
EEZ	Exclusive Economic Zone
FC	Financial Controller
GIS	Geographic Information System
GPS	Global Positioning System
GS	Government Statistician
HCC	Honiara City Council
HIES	Household Income & Expenditure Survey
Hh	Household
HhH	Household Head
HhL	Household Listing
H	Household Tables
ILO	International Labor Organization
ISCO	International Standard Classification of occupation
ISIC	International Standard Industry Classification
MGA	Main Group Archipelago
MDPAC	Ministry of Development Planning & Aid Coordination
MECDM	Ministry of Environment Climate Changes Development Management
MHMS	Ministry of Health Medical Services
MLHS	Ministry of Land Housing and Survey
MoFT	Ministry of Finance and Treasury

**Notes:**

<sup>1</sup> The 2009 figures are adjusted (based on 8.3% undercount in 2009 Census); For urban growth rate, only the total and Honiara are adjusted

<sup>2</sup> Based on the Solomon Islands youth definition

<sup>3</sup> Proportion of population 15 years and older who are able to read and write a simple sentence in any language

<sup>4</sup> Proportion of population aged 15 to 24 years who are able to read and write a simple sentence in any language

<sup>5</sup> Proportion of population 5 years and older who are able to read and write a simple sentence in any one language

<sup>6</sup> Average number of children per woman aged 45-49

<sup>7</sup> Institution include boarding schools,prison,hospitals,hotels/hostels/guest houses, some boats:

## **Part 1: KEY FINDINGS**

The Population and Household tables included in this Volume 2 Basic Table report were derived from the Solomon Island 2019 Population and Housing Census. Significantly, these statistical tables are useful for wider audience but specifically meant for users with statistical background such as planners and policy makers, researchers, specialists, and donor representatives.

The set of tables presented here adhere to the United Nations principles and recommendations for population and housing censuses to ensure a consistent standard of comparability with the previous census. Inclusion of new tables are included thus make changes to the numbering, ordering and table titles of tables in each group. It is important to note that numbering of each person table links to the chapters in Volume 1 Census report. Therefore, table 1 starts with P2.1 in which P stands for “Persons”, 2 represent the Geography chapter in Volume 1 report and 1 shows the first table of Geography chapter and presented in ascending order. Whilst numbering of household tables starts with H1 where ‘H’ stands for Household.

The Volume 2 Basic Table report contains 105 tables in total distributed into fifteen (15) subject matters. The person tables comprises of 70 tables and 35 tables household tables. The main subject matter topics are:

1. Geography
2. Age structure
3. Population Dynamics
4. Urbanisation
5. Fertility
6. Mortality
7. Migration
8. Social Characteristic
9. Education and Literacy
10. Disability
11. Communication and Internet
12. Economic and Labour Force
13. Formal and Informal Sectors
14. Household and Housing
15. Constituency Development Fund

<b>List of Table</b>	<b>Page</b>
<b>A. Population Characteristics</b>	
<b>2. Geography</b>	
P2.1: Total population and number of private households, by census years and province, Solomon Islands: 1970-2019	8
P2.2: Total population by sex and number of private households and Non-Private Dwelling by ward, Solomon Islands: 2019	9
<b>3. Age Structure</b>	
P3.1: Total Population by 5-year age groups and sex, province and ward, Solomon Islands: 2019	14
P3.2: Male Population by 5-year age groups and sex, province and ward, Solomon Islands: 2019	21
P3.3: Female Population by 5-year age groups and sex, province and ward, Solomon Islands: 2019	28
<b>4. Urbanization</b>	
P4.1: Total Population by sex, by urban-rural distribution and province, Solomon Islands 2019	35
P4.2: Total Population by sex and number of private households and Non private dwellings/Institutions by urban-rural distributions and ward, Solomon Islands: 2019	36
P4.3: Total Population by 5-year age group and sex, province and urban-rural residence, Solomon Island: 2019	42
P4.4: Total Population by urban centers by 5-year age group and sex, Solomon Islands: 2019	50
<b>5. Fertility</b>	
P5.1: Female Population 15 years and older by 5-years age group and whether ever giving birth by province and urban-rural residence, Solomon Islands: 2019	54
P5.2: Female Population 15 years and older by 5-years age group and total number of children Ever borne alive by province and urban-rural residence, Solomon Islands: 2019	56
P5.3: Female Population 15 years and older by 5-years age group and total number of male Children ever borne alive by province and Urban-rural residence, Solomon Island: 2019	64
P5.4: Female Population 15 years and older by 5-years age group and total number of female Children ever borne alive by province and Urban-rural residence, Solomon Island: 2019	72
P5.5: Female Population 15 years and older by 5-years age group and number of surviving children by sex of child, province and urban-rural residence, Solomon Islands: 2019	80

P5.6:	Female Population 15 years and older by 5-years age group and number of children, living in mother's household by sex of child, province and urban-rural residence, Solomon Islands: 2019	82
P5.7:	Female Population 15 years and older by 5-years age group and number of children, Not living in mother's household by sex of a child, province and urban-rural residence, Solomon Islands: 2019	84
P5.8:	Female Population age 15 -54 years by live births in 12 months preceding the census by Solomon Islands: 2019	86
P5.9:	Years of birth of last child born by province and residence of mother, Solomon Islands: 2019	87

## **6. Mortality**

P6.1:	Total Population by 5-year age group and whether biological mother is still alive, Solomon Islands: 2019	88
P6.2:	Total Population by 5-year age group and whether biological father is still alive, Solomon Islands: 2019	90
P6.3:	Female population 15 years and older by 5 year age group and total number of children Death by Province and urban-rural residence, Solomon Islands: 2019	92
P6.4:	Female population 15 years and older by 5 year age group and number of male children Death by province and urban-rural province and urban-rural residence, Solomon Islands: 2019	100
P6.5:	Female population 15 years and older by 5 year age group and number of female children Death by and urban-rural residence, Solomon Islands: 2019	108
P6.6:	Number of private households with death of household residents during the 12 months Preceding the census by province and urban-rural residence, Solomon Island: 2019	116
P6.7:	Number of deaths of households residents during the 12 months preceding the census by age and sex of deceased by province and urban-rural residence, Solomon Island: 2019	117

## **7. Migration**

P7.1:	Total Population and whether place of birth same ward as place of enumeration, Solomon Islands: 2019	120
P7.2:	Total Population by place of enumeration and place of birth, Solomon Islands: 2019	120
P7.3:	Overseas born Population by country of birth, Solomon Islands: 2019	122
P7.4:	Total Population and whether place of usual residence same ward as place of enumeration, Solomon Islands: 2019	123
P7.5:	Total Population by province and place of usual residence if different from current place of residence (Ward), Solomon Islands: 2019	124
P7.6:	Population usually residing overseas by country of residence, Solomon Islands: 2019	125

P7.7:	Total Population and whether place of usual residence 5 years ago same ward as place of enumeration, Solomon Islands: 2019	125
P7.8:	Total Population by province and place of usual residence 5 years ago if different from current place of residence (ward), Solomon Islands: 2019	126
P7.9:	Population who lived overseas 5 years ago by country of residence, Solomon Islands: 2019	126
P7.10:	Total Population by place of enumeration and place of residence 5 years ago, Solomon Islands: 2019	127

## **8. Social Characteristics**

P8.1:	Population 15 years and older by marital status, 5 year age group and sex, province and urban-rural residence, Solomon Islands: 2019	129
P8.2:	Total populations by province and religious denominations, Solomon Islands: 2019	142
P8.3:	Total Population by ward and religious denomination province, Solomon Islands: 2019	143
P8.4:	Total Population by ethnic group by sex and province Solomon Islands: 2019	150
P8.5:	Total Population by ethnic group, 5 year age group and sex, Solomon Islands: 2019	152
P8.6:	Total Population by citizenship and sex, province and urban-rural residence, Solomon Islands: 2019	154
P8.7:	Total Population by age and sex, and citizenship Solomon Islands: 2019	154

## **9. Education and Literacy**

P9.1:	Population 5 years and older by sex and whether attending a formal educational institute by ward, Solomon Islands: 2019	155
P9.2:	Population 5 years and older by age and sex whether attending a formal educational Institute, Solomon Island: 2019	161
P9.3:	Population 5 years and older who attended a formal educational Institute by sex and level of education attended, Solomon Islands: 2019	162
P9.4:	Population 5 years and older who attended a formal educational Institute by age and sex and level of education attended, Solomon Islands: 2019	164
P9.5:	Population 12 years and older by sex and highest level of education completed by province and urban-rural residence, Solomon Islands: 2019	167
P9.6:	Population 12 years and older by age and sex and highest level of education completed, Solomon Islands: 2019	169
P9.7:	Population 5 years and older by age, sex, and literacy by language, Solomon Islands: 2019	171
P9.8:	Population 5 years and older by sex and literacy by language and province, Solomon Islands: 2019	174
P9.9:	Population 5 years and older by age and sex literate in any language by province and urban-rural, residence, Solomon Islands: 2019	175
P9.10:	Population by 5 years and older by age and sex not literate* by province and urban-rural residence, Solomon Islands: 2019	178

## **10. Disability**

P10.1:	Population 5 years older by sex, reporting difficulties in seeing, Solomon Islands: 2019	180
P10.2:	Population 5 years older by sex, reporting difficulties in hearing, Solomon Islands: 2019	181
P10.3:	Population 5 years older by sex, reporting difficulties in walking, Solomon Islands: 2019	182
P10.4:	Population 5 years older by sex, reporting difficulties in remembering, Solomon Islands: 2019	183
P10.5:	Population 5 years older by sex, reporting difficulties in self-care, Solomon Islands: 2019	184
P10.6:	Population 5 years older by sex, reporting difficulties in communicating, Solomon Islands: 2019	185
P10.7:	Population 5 years older by sex, reporting severe disability by sex and province, Solomon Islands: 2019	186

## **11. Mobile and Internet**

P11.1:	Population 12 years and above who owns a mobile phone by sex and province, Solomon Islands: 2019	187
P11.2:	Population 12 years and older by mobile phone in working condition by province, Solomon Islands: 2019	187
P11.3:	Population 12 years and above by use of internet by sex, ward and province, Solomon Islands: 2019	188
P11.4:	Population 12 years and older by reason for using internet from mobile/cell phone by province, Solomon Islands: 2019	195
P11.5:	Male Population 12 years and older by reason for using internet from mobile/cell phone by urban-rural, Solomon Islands: 2019	196
P11.6:	Female Population 12 years and older by reason for using internet from mobile/cell phone by urban- rural and province, Solomon Islands: 2019	197

## **12. Economic and labour force**

P12.1:	Number of Persons 12 years+ in Employment within Province by Sex and Urban-Rural area, Solomon Islands 2019	198
P12.2:	Number of Persons 12 years+ in Unemployment within Province by Sex and Urban-Rural area, Solomon Islands 2019	206
P12.3:	Number of Persons 12 years+ Not in Labour Force within Province by Sex and Urban-Rural area, Solomon Islands 2019	214
P12.4:	Number of Persons 12 years+ in Economic Activity (industry) and Sex by Province and urban-rural area, Solomon Islands 2019	222
P12.5:	Number of Persons 12 years+ in Main Economic Activity (industry) Category and Sex by Province and urban-rural area, Solomon Islands: 2019	225

## **B. Housing and Household**

H1:	Number of private households by number of occupants by sex, and average household size, by ward and urban-rural distribution, Solomon Islands: 2019	226
H2:	Population living in private households by sex and relationship to head of households, by province and urban-rural residence, Solomon Islands: 2019	233
H3:	Number of private households by main source of household income by province, Solomon Islands: 2019	234
H4:	Number of private households receiving remittances in the last 12 months by total amount (SI\$) received, and by province, Solomon Islands: 2019	235
H4a:	Number of private households that receive remittances by province, and location of sender of remittances, Solomon Islands: 2019	235
H4b:	Number of private households that receive remittances by province, and location of Oversea sender of remittances, Solomon Islands: 2019	236
H5:	Number of private households involved in growing food by type of cash crop and province, Solomon Islands: 2019	237
H6:	Number of private households and whether raising livestock by province, Solomon Islands: 2019	238
H6a:	Total number of livestock by province, Solomon Islands: 2019	238
H7:	Types of Fish species catch by males and females in the household by province, Solomon Islands: 2019	239
H7.a:	Number of private households involved in fishing by type of activity and province, Solomon Islands: 2019	239
H7.b:	Number of private households catching fish or shellfish by frequency and province, Solomon Islands: 2019	240
H7.c:	Number of private households buying fish or shellfish by frequency and province, Solomon Islands: 2019	241
H8:	Number of private households by housing tenure by province, Solomon Islands: 2019	241
H9:	Number of private households by land tenure by province, Solomon Islands: 2019	242
H10:	Number of private households by type of living quarters, by province and ward, Solomon Islands: 2019	243
H11:	Main material used for walls, floors and roof by province and urban-rural distribution, Solomon Islands: 2019	250
H12:	Number of private households by number of rooms, by province and urban-rural distribution, Solomon Islands: 2019	251
H13:	Number of private households by main source of drinking water by province, Solomon Islands: 2019	251
H14:	Number of private households by Hand washing facility by province, Solomon Islands: 2019	252
H15:	Number of private households by main toilet facility by province, Solomon Islands: 2019	252
H16:	Number of private households by main form of household rubbish disposal by province, Solomon Islands: 2019	253

H17:	Number of private households by main source of lighting by province, Solomon Islands: 2019	253
H18:	Number of private households by main source of cooking energy by province, Solomon Islands: 2019	254
H19:	Number of private households by availability of at least one household durable in working order by province, Solomon Island: 2019	254
H20:	Total number of household items in working order by province, Solomon Islands: 2019	257
H21:	Number of private households by number of bed nets (insecticide treated) by province, Solomon Islands: 2019	258
H22:	Number of private households by expose to Hazards by Province, Solomon Islands: 2019	258
H22a:	Number of private households by frequency of Hazards by Province, Solomon Islands: 2019	260
H22b:	Number of private households with disaster plan and Province, Solomon Islands: 2019	260
H22c:	Number of private households with preparedness measures by Province, Solomon Islands: 2019	261
H22d:	Number of private households by mode of accessing Hazards warning by Province, Solomon Islands: 2019	262
H22e:	Number of private households by knowledge of understand Hazard Messages by Province, Solomon Islands: 2019	263
H22f:	Number of private households by Vulnerable groups of people to Hazard by Province, Solomon Islands: 2019	263
H23:	Perception of households on the main impact of CDF, main area of assistance, issues, and suggestions by province and urban-rural areas, Solomon Islands: 2019	264

## A. POPULATION CHARACTERISTICS

*\*Note that this data refer to lifetime migration among wards and bydefect,among provinces.Persons born and enumerated in a given province are not provincial migrants;thus,persons born in a given province can be dessagregated between those born in the same ward where enumerated and those enumerated in another ward ) but within the same province).Those enumerated in a province different from the province of birth are ,obviously,provincial migrants.*

## **Part 2: Census Operation and Procedures**

## 1.1 Introduction

A population and housing census is simply a total count of all persons, households and dwellings in the Solomon Islands during a specific time ('census night'). By definition, a census is "*A canvass of a given area, resulting in an enumeration of the entire population and the compilation of demographic, social and economic information pertaining to that population at a specific time*"<sup>1</sup>.

Census undertaking had been planned within the scope of the Solomon Islands National Statistics Development Strategy (NSDS) 2015-16 to 2035 in accordance with the Census Act cap 53, the Statistics Act (1970), amendment (2007) that mandates the SINSO to carry out this national exercise. A population census in the country is usually planned to be conducted every ten years as stipulated in the Census Act and in accordance with United Nations (UN) recommendations for an intercensal period, in view of country context and costs.

The latest National Population and Housing Census in Solomon Islands was conducted in November 2019. By reasons of comparison, the 2019 Census was conducted on a two-round enumeration, and the effected official reference period best known as the 'census night' was the midnight of 24<sup>th</sup> November 2019.

The 1970, 1976, 1986, 1999, 2009 and the recent 2019 Census were all de-facto enumerations, that is, people were counted where they happened to be on the census night, irrespective of whether this was their place of residence or not. These censuses were also carried out by using a so-called two visit system.

The 2019 Census provides important detailed demographic-social and economic information relating to the entire population at a single point in time. It provides a comprehensive picture of the country's population and housing characteristics at the given time. The census data and findings are important for policy, planning and decision-making, and often the government uses the data to effectively deliver public goods and services to the people, especially those in vulnerable communities. In the absence of accurate or updated data, it would be difficult, for example, for the government to identify and allocate resources for social services (e.g., schools and hospitals) and infrastructures (e.g., wharves and roads).

Consequently, census data supported national strategies and policies such as the National Development Strategy (NDS), Medium-term Development Strategy (MTDS), National Population policy, and the government's Fiscal (budgetary) and Monetary policies – especially where it relates to the allocation of public funding to key areas such as health, education and social services. Moreover, the data supports plans for policy development and planning by provincial and local level governments including various key stakeholders such as private organizations and other data users. The census data is also important for statistical purposes such as the establishment of sampling frame for surveys.

---

<sup>1</sup> 2019 Population and Housing Census Enumerator's Manual

In general, it is important to note that the main users of census information such as the government, local authorities, businesses, community organizations and the public depend on the 2019 Population and Housing Census of Solomon Islands as a benchmark information for the next ten years.

## **2.1 Census history**

Censuses in the Solomon Islands dated back to colonial times. The first census was conducted in 1931, however, it was little more than an incomplete head count. The second one was conducted in 1959, but it was a sample census, and the third census in the country was conducted in 1970. Although the 1970 census was of limited scope, it was considered a proper census. Not until 1976 when an official census was conducted with improved collection method and quality of instruments which led to further improvements for the census rounds of 1986, 1999, 2009 and the recent 2019 Census which were referred to as absolute censuses.

With respect to the legislative basis of the census in the country, compliance and enforcement of the census is covered within the scope of both the Census Act cap 53 (CA), the Statistics Act 1970 and Amendment 2007 (SA). The regulatory provisions are discretely prescribed by the SA, where one of the important provisions is the authorization of the SINSO as the only government office to collect, analyse and produce official statistics in the country under the leadership of the Government Statistician (GS). As such, the legislative provisions of the Statistical Act 1970, Amendment 2007, and the Census Act cap 53 mandated the GS through the SINSO to carry out the 2019 Census operation.

The regulation also authorizes the GS to be responsible for the administration and the completion of the census project. However, under the preserved administrative regulations and provisions, the CA provides for the appointment of a Census Commissioner (CC) to administer the census project. The GS therefore has the authority to recommend the CC to take full responsibility and management of the census project. According to the prescribed protocols, this recommendation would be submitted to the Prime Minister (PM) by the Permanent Secretary (PS) of the Ministry of Finance and Treasury (MoFT). The PM would then consider this recommendation, and if favourable, shall endorse the recommendation allowing the gazetting of this endorsement and made the public announcement of the CC's appointment. In addition, the provision of the regulations and the protocols enabled the SINSO to carry out the necessary activities required to implement all the necessary census activities.

Universally, the history of censuses dated back to biblical times when Moses the leader of the children of Israel was commanded to conduct the census of population in the wilderness, as recorded in the book of Numbers. Moreover, the famous census in the Jews calendar was conducted when Jesus Christ was born in Bethlehem. The transition of European civilization revealed that an official population census was first conducted in England and Scotland in March 1801, Ireland in 1811 and Australia in 1828. The first New Zealand census was undertaken in 1851.

### **3.1 Census planning and management**

The planning for the 2019 Census commenced in 2017 by SINSO, including the implementation of the Village Resource Survey (VRS) project from 2017 to early 2019 that included the updating of all households (household listing exercise) in the country.

A project design proposal for the 2019 Census was developed that included the strategy for the conduct of the 2019 Census including the proposed work plan (pre-enumeration, enumeration, and post enumeration activities). A proposed budget costing for the project was also included. This proposal was submitted to all major donors and development partners. While major donors and development partners expressed support for the 2019 Census, support in terms of grant financial support and technical expertise was negligible.

From the planning and management perspective, the 2019 Census had two main objectives. Firstly, it was to ensure that the process of collecting, compiling, evaluating, analysing and disseminating of demographic, economic and social data were conducted in a timely and accurate manner. The development of procedures and processes for the 2019 Census drew from lessons learned in previous censuses, and built upon recommendations for improvements. Secondly, it was a valuable opportunity for the capacity development and training of staff of the SINSO in participating in the planning, design and implementation of the 2019 Census, thus resulting in enhancing the capacity of the SINSO, its image, credibility and reputation within government and society.

Upon establishing the Census Project Office, administrative and legal arrangements for organising census committees such as Census Users Committee (CUC) commenced. Mandated roles and functions of various Census working committees were implemented under the directive of the GS/CC and SINSO/Census management in the development of 2019 Census overall design and strategy. The main role of CUC was to review and update the 2019 Census questionnaires and inclusions of new questions from policy makers and users for data that was required to measure, monitor and evaluate various organisational strategies and policies. Questions discussed will depend on the consensus of the CUC. This committee would consist key users of the census data such as government ministries, key stakeholders, civil society, non-government organisations (NGO) and development partners. It was advised that the users be guided by the desirability of obtaining data that comparable with those of previous censuses.

The involvement of CUC in coordinating the questionnaire design phase resulted in some of the key new inclusions in the 2019 Census questionnaire. This included financial inclusion questions from the Central Bank of Solomon Islands (CBSI), extended questions on disability from the Washington Group, questions from the Ministry of Environment, Climate Change and Disaster Management (MECDM), questions about hygiene and rural water supply from R-WASH under Ministry of Health and Medical Services (MHMS) and questions about the perceptions of households on the Constituency Development Fund (CDF) that is administered by the Ministry of Rural Development (MRD).

Prior to the Census proper, important preparations were made and activities undertaken which included the following: (i) a household listing exercise (undertaken with the VRS), (ii) a pilot census, (iii) preparation of training manuals and aids, (iv) production of maps, (v) the design and printing of questionnaire, manuals, registration books, (vi) the procurement of office & census field operation equipment, (vii) the recruitment of staff; and (viii) the establishment of Census Project Office. Moreover, the (ix) planning and execution of transport schedules to gather supervisors and enumerators in the training centres, transport to assist movement to and from their allotted EA's, and (x) publicity and awareness needed to inform the whole population about the census exercise through various media outlets. These tasks were done and completed strictly in accordance to census work-plan schedule. The census effort therefore required utmost co-operation from all parties involved, authorities at various levels, private organisations and the village and urban populations. Most of these major tasks were managed by the Census Project Office. Moreover, the exact date for the census night was decided by the CC in consultation with government departments and other bodies particularly with the ministry of education. The census date, commonly referred to as 'Census night' on the 24<sup>th</sup> of November 2019 was officially announced by the Prime Minister during the official launch of the 2019 National Population and Housing Census project on the 5<sup>th</sup> day of July 2019.

Other important areas included the review of linkages between census and other projects (surveys) and the review of national geographical enumeration area (EA) boundaries. The application of both national and international standard and classifications (NISC) were revised as well. This process led to updated EAs that enabled the effective management of work load allocations for field enumerators and supervisors.

Financial management involved developing a realistic budget, the process of channelling the budget for approval, budget training, budget review and developing a budget management system. This process followed the government system and processes (e.g., the PFMA Act and financial instructions).

The vision and mission of the 2019 Census was embraced through the slogan "Kaont blo mi, Fiusa blo mi" in the Pidgin language, which in English means "My Count, My Future". This was embraced by the project team, and the communications and media team who provided awareness within the communities. In line with the work plan, staff were delegated responsibilities and with a strong team spirit of bonding and collaboration, the census work plan was conducted in an effective and efficient manner. Staff at all levels were encouraged to have an open mind set in addressing issues. Participation from other parties both within and outside the government were encouraged through the CUC. As a result, a wider community including the National and Provincial Government, NGOs, and the public supported the 2019 Census project. In fact, the full support was received from Solomon Island Government (SIG). Other support received came from Republic of China (ROC) - Taiwan, United Nation International Children Emergency Fund (UNICEF), MHMS, CBSI and MECDM.

Data consistency between censuses was an important consideration in the overall census planning. Even during the analysis phase, caution was exercised during direct comparison of certain variables amongst different census periods due to changes in methodologies, cases of

undercount experienced in past censuses, misreporting and other data quality issues.

Planning on improved technologies to be applied in the 2019 Census included the use of computer assisted personal interviews (CAPI) approach in certain EAs of Honiara while paper and pencil based interviews (PAPI) approach was applied for the other of the provinces and the other areas of Honiara. The use of geographic information system (GIS) for mapping purposes enhanced the workload materials in supporting the field plans for actual enumeration.

The 2019 census enumeration fieldwork planning underwent a two round census enumeration method following the de-facto approach. The reason being that visiting all households twice instead of once was believed to improve the data quality and had proven its merits in the previous census. The first visit took place two weeks prior to the official census date, to be followed by a second visit shortly after the census night. All enumerators were required to visit all households (on average 60 households) in their allocated EAs. The enumerator was to return to the households after census date, on which occasion the enumerator had to verify any changes in the households such as visitors, births, and deaths recorded and update the household data accordingly. The two-tiered approach was implemented in the majority of EAs, but there were areas encountered that was difficult to fully implement the two-tiered visits in these areas, especially those in Honiara, Guadalcanal, and Malaita.

### **3.2 Management**

The management of the census project was the greatest challenge of the day-to-day census activity operations. To address the challenges, a weekly update or adhoc meetings had to be conducted to discuss issues affecting the census operation including staffing issues, as well as to follow-up on the work progress in the respective key work areas. Committed SINSO/Census Officers responded to various issues and other staff were engaged despite having other core functions to perform in their respective units.

Strong leadership capacity was critical for the success of the 2019 Census project. The appointment of a vibrant and experienced CC was critical in ensuring strategic and visionary leadership and that was demonstrated from the start to the conclusion of the census enumeration. A strong management team consisting of the Deputy CC, the Resident Statistics Adviser, and professional staff was important that ensured that the relevant leadership and management capacity was intact for the implementation of the census project. Key census project positions were seconded to SINSO staff including the two departmental units namely, the Social and Census & Survey units were engaged on full time basis during peak period of the census field operation. While overseas technical assistance and advice on the ground was critical to enhance capacity, unfortunately support from regional agencies and donors was very minimal.

Ensuing strong anti-graft and good governance practise is critical in ensuring public trust of the census project. The management process also involved careful processing of various claims for payments. There were numerous claims for payment of all sorts; including bogus claims submitted by census field workers and service providers to the Census Office. A committee was established to scrutinize and verify all claims for genuineness. Census field workers withholding forms and census equipment in order to obtain their outstanding payments were

issues that were also addressed by the Census Office management.

The internal process of financial management, raising requisitions and making payments followed the government process. Overall management of funds in line with the census activity work-plan must firstly be endorsed by CC, certified by Financial Controller (FC), and then approved by PS from MoFT. The Line of Command or protocol to follow when issues emerged should be from the Enumerator reporting to the Supervisor, and to the Area Manager (AM) to Census District Superintendent (CDS) who would act on behalf of CC in the province.

#### **4.1 Project budget**

The project description for the 2019 Population and Housing Census of Solomon Islands was prepared in 2017/2018 and submitted through the Ministry of Development Planning and Aid Coordination (MDPAC). The estimated budget total was SBD \$83,860,586.44. According to the census work plan, this budget was to be expended over a span of four-year period from 2018 to 2021<sup>2</sup> the life expectancy of the census project. Overall, the government (SIG) contributed funding was 93.2 percent of the total census budget, almost fully funded, and Republic of China (ROC)-Taiwan assisted around 4.9 percent of the budget. More than half of the total budget was expended in 2019.

Generally, costs associated with staff wages/salary and accommodation and touring allowances took up the largest share, and the second largest expenditures were on survey/field equipment followed respectively by training, publicity, transport, equipment and others. Refer to Appendix 2 for the summary break down of the contributors and the total expenditures between 2018 and 2020. The budget amount lines by a single donor (ROC) partner and SIG may have changed during the actual spending period.

#### **5.1 Geographical division**

Data collection, tabulation and analysis were based on the administrative boundaries as defined in the Report of the Constitutional Boundaries Commission 1995/6 review. This consists of a hierarchical system comprising three different levels:

- the national level; Solomon Islands
- the provincial level: nine provinces plus Honiara City Council
- the ward level: 183 wards divided over the ten province level entities.

For field operational purposes the whole country was divided into 1,766 Enumeration Areas which were defined within the ward boundaries, thus constituting a fourth level. Although the division into EAs did not have any official administrative status and differs per census, these demarcations were important to derive equal workloads per enumerator. This structure was also important in supporting the sampling frame for specialized surveys during inter-censal periods and provides the country map at lower EA levels that gives the geographical divisions

---

<sup>2</sup> 4 Project description for the 2019 National population and housing of Solomon Island

of provinces, wards and EAs.

Within the general geographical division, census information can also be derived for constituencies - an intermediate level between province and ward, essentially by combining a number of wards. The constituency boundaries are inclusive in the maps as well as village information that is a characteristic of geographic division with a three-digit code in the database. A village, however, is not part of the general identification code as they are not part of the official administrative entities as they rely on subjective definitions, and tend to change in terms of composition, location and name.

## **6.1 Mapping**

The objective of the mapping component was to ensure that the maps provided complete coverage of the country by province, ward and EA. Maps were designed to avoid omissions and double counting of selected EAs and to accommodate a reasonable workload for census enumerators, and that geographic identifiers could also be used for analysis and dissemination purposes by the QGIS system. See Annex 5 for digitised maps at the provincial and ward level.

SINSO began building its capacity in the areas of GIS during the previous 2009 Census, having also collaborated with the Ministry of Lands, Housing & Survey (MLHS) for support. The SINSO now has census cartography staff under the Census/Survey Unit who are able to generate quality digitized maps and that were prepared in time for the 2019 Census. In 2018/2019 the household listing exercise was conducted to enhance redesigning of existing EA maps that might have changed over time. This was done by amalgamating or splitting up bigger EAs to achieve an average of 60 households per EA. This was based against travel time by enumerators as the size of an EA was a factor that had implications on workload. EA mapping updates through the household listing exercise included the name of household head, the total number of males and females, the households Global Positioning System (GPS) waypoints, and the total number of males and females ages 17 and above. The latter is an important population requirement by the Electoral Office to foresee the probable estimated total of eligible voters of 18 years above during the 2019 national general election.

Conversion and downloads of the household GPS waypoints and further uploading onto software such as QGIS, and DNR Garmin 10, had enabled the capture and processing of geospatial data such as polygon, lines and points that enhanced necessary adjustments and production of map layout, and templates. This supported and facilitated the re-design of the EA boundaries. The EA boundary-lines were clearly identifiable by permanent or semi-permanent structures like road, rivers, ridges and streams. Altogether, the re-design exercise accumulated a total of 1,766 EAs an absolute increase of 422 EAs from the existing 1,344 EAs in the 2009 Census.

The provisional maps for the pilot census was produced in July 2019. This was followed by the production of single EA maps for the whole country in preparation for the census enumeration to start on the 4<sup>th</sup> of November 2019. The maps for all rural areas were produced

on the scale of 1:10,000 and the urban area maps were produced on the scale of 1:5,000.

In addition, the sophistication of the software's used had enabled quick spot checks on household omissions and duplications in the census database. This is possible by merging map GPS identification code with GPS identification in the census database using both the household listing and the census databases, essentially it also serves to balance out the loose end for both databases. Technically, the GPS technology was also used to link census questionnaire with geo-reference households and EA boundaries. This technology will continue to be expanded to ensure future censuses and survey benefit from its application.

### **7.1 Questionnaire design**

The design and the language or wording of the 2019 Census forms needed careful development and testing. The 2019 Census questionnaire consisted of two parts, the first part covered person information and the second part consist of household characteristics and housing.

The CUC reviewed the 2009 Census questionnaire design process as the first step in formulating the 2019 Census questionnaire form. The first draft of the questionnaire was distributed to all stakeholders, especially members of the CUC including government and NGOs. Important steps were taken in identifying policy issues for consideration to be included in the questionnaire, as discussed earlier. Final considerations and a decision was made regarding the content of the questionnaire by the CUC, and recommendations were made to the CC who then made the final decision on the questionnaire format and number and nature of questions to be covered. Some of the amendments to the questionnaire form included re-ordering of the questions due to the inclusion of new questions such as language, communication and internet, financial inclusion, hand washing, hazard and vulnerability and the government constituency development fund (CDF) questions. Related formatting alignments included children ever born questions boxes, re-wording of the person and household section including field variable length in the household questions, and the inclusion of the second visit check box question. These were often the general kinds of amendments made before final printing of the Census questionnaire.

### **8.1 Village Resource Survey /Household listing**

Prior to the establishment of the Census Project Office within the SINSO, a Village Resources Survey (VRS) was conducted in 2017 to early 2019. One of the main objectives of the VRS was to collect up to date population data and the number of households in each village and ward. This information would then assist in the re-designing of EA boundaries with an average of 60 households per EA or 350 persons – to also enable equal allocation of enumerator workloads during enumeration. An average of 40 households per EA was also considered for scattered households in an often isolated enumeration area.

The VRS collected basic information on the names of villages, location, the number of people within the villages by sex and age, and data related to the environment, nature and types of

government services such as schools, aid posts, courts etc and how people accessed basic services.

During the Village Resource Survey, a training for GPS was conducted with an emphasis on capturing villages and households by GPS recordings where the Supervisor would take a GPS recording of households and go to the middle spot of a village and capture the village GPS points.

Furthermore, the GPS waypoints provided updated information to support the creation of new EAs by re-drawing the boundaries of existing ones. A total of 422 new EAs were drawn increasing the number of EAs to 1,766. The mapping was undertaken to ensure that EA boundaries were clearly demarcated and consists of average 60 households each per EA. The majority of EAs matched this profile though some exceeded 100 households and were reviewed for further demarcation where necessary. This census mapping work will also benefit subsequent analysis and geographical presentation of statistics and in general for future surveys.

The household listing exercise also collected information about the household head, population by sex, population 17 years and above and a household sticker number assigned to the household and usually placed on a spot on the household dwelling. Basically, the household head and the sticker number assigned to the households serves almost the same purpose that is, it would be employed as a quick identification and cross examination of households within the census area during census enumeration. The population by sex provided a rough estimate of the population assumed to be enumerated during the 2019 Census and thus acts as an important reference for planning and the 17 years and over population, and also to support Electoral Commission in preparation for the general election in April 2019. This data was also used to provide the backup data source from which to derive the number of eligible voters. To this extent the household listing included a count of 17 years and over population estimate who would be 18 years old by the time of the election.

The handheld GPS units were utilized in the training that was conducted by SINSO and deployed when conducting the household listing exercise. Technically the GPS technology was also used to link census questionnaire with geo-reference households and EA boundaries.

## **9.1 Pilot census**

Pilot training was conducted from 21<sup>st</sup> to 23<sup>rd</sup> August 2019 in Honiara. Training was conducted by senior staff of SINSO, the Financial Inclusion team from CBSI and Senior staff from NDMO. A total of more than 20 SINSO staff and census workers from Honiara and Guadalcanal attended the training program.

The pilot census enumeration was conducted from 26<sup>th</sup> to 30<sup>th</sup> August 2019 in Guadalcanal and Honiara. Three teams consisted of SINSO staff and CAM from Honiara were deployed to three-enumeration area representing Rural in (Turarana Village, Ward 19), Peri-urban area in

Burns Creek (Tandai, Ward 1) and Urban (Lengakiki, Ward 3). The main objective for conducting the pilot census was to test, review, and revise the census questionnaire including assessing the level of public perception and reception about the census. Revising of questionnaires included improvement made to the check and editing process such as skip procedures, formatting the structure of the form, introducing additional new questions and separating the Non-Private Dwelling (NPD) questionnaire to be undertaken separately. The overall conclusion of the pilot exercise gave SINSO/Census management confidence in the implementation of the 2019 Census including scheduling the training and completion of enumeration timelines. The final draft of the questionnaire was fixed into an extra-large A3 size paper as recommended by the pilot census enumeration.

### **10.1 Organizational structure of census office**

The 2019 Census Project organizational structure (see Annex 3) was designed to ensure the overall implementation of the work-plan and interrelated activities such as the questionnaire design, publicity, training, mapping, field operation, data processing and financial accounts. Each of these activity areas, report directly to the CC. The organizational structure and reporting firstly followed the statues and protocols stipulated in the Census Act and the Statistics Act and secondly the governments general orders and codes of ethics when dealing with the recruitment processes and grievousness, and the governments PFMA Act when dealing with financial matters.

The census enumerator manual provided guidelines of communication channels and processes in the main activity areas to harmonize and to manage the quality of communication and to ensure clear guidelines were in place to follow in solving problems and seeking guidance in line with the Census and Statistics Acts, and the general orders of government. The challenge for the Census Project was in developing and prospering a work environment that enabled census personnel to perform all these tasks with a common goal in mind.

The CC who was the Government Statistician (GS) was responsible to the Permanent Secretary (PS) for the MoFT. Collaboration with other ministries, provincial governments and NGOs were undertaken either by direct contacts or through the CUC. The Census Project Office remained a separate office from the SINSO to allow the latter to continue its own programmes, but a close collaboration and liaison between the two offices ensured successful completion of the 2019 Census Project. The Census Office drew heavily on SINSO staff to help in capacity development and to gain valuable experience.

### **11.1 Staffing and recruitment**

The CC was appointed by the caretaker PM Honourable Rick Houenipwela in March 18 2019. This appointment resulted in the setup of the Census Project Office and appointments of the Census Statisticians, Secretary, Cartographer, Census Provincial Coordinators, Communications and media staff and financial accounts staff. The data processing consultants Dr. Michael Levins and Mr. Jomer Manongsong were supported by local staffs of SINSO. The Census finance officers were seconded from MoFT. Other financial officers were recruited on contract basis. About

twenty SINSO staff worked for the Census Project including the SINSO Residential Advisor, Dr. Willie Lahari who had to assume the role of the Census Technical Adviser. He led the planning, design, and provide technical advice in all areas of census operation up till its successful implementation and completion. In addition, there were, 8 CDS, 46 AM including CAM, 64 trainers, 704 supervisors and 2,465 enumerators. Census data processing section recruited 52 quality checkers, 74 Census Coders and 33 Census data entry. The data processing recruiters were mostly enumerators and supervisors who worked in Honiara during the enumeration.

Furthermore, based on the geography of the county, Census District Superintendents (CDS) were appointed covering nine provinces and one main urban area (Honiara) classified into eight Census Districts (CD). In each of these Census Districts comprised one to three provinces, where a CDS was in charge of the execution of all preparatory work and of the actual conduct of the 2019 Census enumeration in consultation with the Census Commissioner. The CDS, most or all of whom were Solomon Islanders who worked closely with the provincial authorities and in collaboration with the Chief Area Managers (CAM) and/or the Area Manager (AM) who were also appointed by the Census project, and depending on the scale of work involved has overall operational oversight over each of the respective CDs in a particular province. The CAM and AM reported directly to the CDS and ensured all field enumeration in the actual designated enumeration areas (EAs) were covered and enumerated. They were also responsible for checking all EA maps and household listing data provided by the Census Office on the basis of information collated from the recently completed listing operation and VRS. They also explained the purpose of the census in village meetings, prepared a transportation plan for the area, assisted in recruiting supervisors and enumerators, undertook enumerator/supervisor trainings and in co-ordinated transport and logistics during the actual census enumeration.

## **12.1 Publicity**

The main objective of publicity was to ensure all Solomon Islanders including foreigners from rural and urban populace understood the benefits and importance for individuals taking part in the 2019 Census. It was important that the wider community were aware of when the census was to be carried out and what they needed to do that involved their participation. The awareness attempted to also seek understanding and the cooperation of every individual in the country through effective use of publicity to also ensure efforts to increase the quality and accuracy of responses required by the Census. With the forming of the communications and media team, the staff engaged in various forms and modes of media communication including social media, internet, mobile phone texting, radio messages, and publishing in the Solomon Star and Island Suns Newspapers. Other platforms included TV presentations, using Digital Screen display, using banner poles, publishing newsletters and leaflets, using the NSO website and a temporary Facebook account for Census 2019, and advocacy through a census theme song and a census Video, T-Shirts and ID cards promotions.

Banners and posters were used to display the Census slogan, “Kaont blo mi, Fiusa blo mi” “My Count My Future” and the dates of enumeration period and census night. This also includes

the Census Office official letter head inscribed with the census slogan. Similarly, T-shirts were printed with a similar content as the banners to promote awareness about the Census.

## **12.2 Radio Programs/Solomon Island Broadcasting Corporations (SIBC)**

This was a common media mode frequency (AM 1035 KHz) used by census communications and media team since its coverage is nationwide. The general public was informed about the census progress and as the census project appealed for public cooperation during the enumeration period. The awareness through radio broadcasting began since the initial stage of 2019 Census preparation till the end of 2019 Census enumeration. Moreover, during the release of the preliminary 2019 Census findings in 2020 and the final release of the analysis reports (vol1) and basic tables and operations (vol 2) in 2023, this mode was also used in disseminating key messages.

Coverage of live interviews were made with the CC to better inform the general population as to why a census undertaking was important and to clarify issues often raised by the general public. One news TV and Radio Happy Lagoon in Western were purposely used as a census advocacy mediums. The general aim of using these media types was to ensure that the population received first-hand information from the Census Office regarding census activities.

## **12.3 Talkback Show Program**

Talkback shows were conducted through the Solomon Islands Broadcasting Commission (SIBC). The programs were used especially to disseminate census information to inform the public and change any negative perceptions as well as draw awareness on the complexity of Census operation, including expressing the Census Managements appreciation of respondent contributions by responding positively to their questions during the enumeration. The public responded positively during the program and thus gave the Census Project confidence in the people's participation in the census and thus ensured its successful enumeration and release of the results back to the community.

## **13.1 Training**

Several different training programs were conducted in Honiara, provincial urban centers and some rural areas. The initial trainings were done in Honiara including the Pilot Census, which was facilitated in August 2019. Training of Trainers (ToT) was conducted in the SINSO/Census office who would later train the supervisors and enumerators throughout the country. These ToTs were assisted in the training by the CDS, CCAM/CAM and AM in their respective provinces. Other important trainings undertaken to improve the efficiency of data collection and the quality of census data involved acquiring skills in the application of the GIS and CAPI modules. Trainings on data quality checks, data coding, and census data entry was also undertaken. In total there were 37 training venues were identified in the provinces and a total of 67 trainers were recruited and were trained by Census/SINSO staff with the guidance from SINSO Resident Statistics Adviser and CC.

The structure and implementation of the training program were managed by the training and field operations team with close communication with the CDSs and AMs to ensure that the training program in all venues throughout the country received all the necessary training resources and equipment's on time and to convene the training at the same time. The administrative arrangements and support at the training venue was supervised by AM. The trainers were instructed (when in doubt) to refer all queries and technical questions raised during the training to the training team in Honiara for clarification. Moreover, it was important for uniformity and common understating amongst all Supervisors and Enumerators in the modules and instruments used in the census, and therefore the training team in Honiara ensured that all trainers involved assisted in ensuring clarity or change that had been made to ensure common understandings and common engagement rules were employed.

A two-week training program was scheduled for supervisors and enumerators in October 2019 that was spread of two weeks. The second week of supervisor training was merged with the enumerator first week of training. This had allowed time to extend the practical enumeration trials, checking and group discussions period during the training. Participants at each training venues, ranged from, 30-60 participants but practically some areas had more participants than others. In total, there were 3,169 participants that undertook trainings. There were approximately 704 supervisors and 2,465 enumerators. However, for special case areas such the remote Islands like Lord-Howe and Sikaiana, (Malaita Outer Islands) the participants attended training in Honiara whilst Tikopia and Anuta, were done in Lata. Moreover, the trainings took into account 20 per cent reserves for 'no-shows' for enumerators and 15 percent for supervisors). Temporary assistance was also needed from the various government authorities in taking roles as professional trainers as well as a few higher level staff to act as coordinators of some of the training centres, in conducting several trainings lasting for approximately 15 working days for the supervisors and enumerators, where the latter group training will be for 10 days. Obviously, the Trainers, and the Quality Controllers were appointed to help screen completed forms/data in the field for data processing purposes were also trained and these persons mainly comprised of SINSO staff (e.g., Statisticians).

### **14.1 Field Operation**

Field operations not only involved the major logistical support (including land, sea, and air transport arrangements) but ensuring the census enumeration was undertaken successfully. Therefore, much consideration and decisions were made concerning this issue. Initially the recommendation for recruitment of the CDSs, AMs, supervisors and enumerators to work in different localities meant that they had to be locals from the respective areas. In this regard, the local knowledge of the EA boundaries and the people of the areas were an asset – in terms of understanding the local languages and traditional customs of these areas was important in planning the logistics and enumeration. These considerations were strongly recommended by Census Project Office so that enumerators may reside in their respective homes (accommodation) whilst carrying out enumeration.

The census enumeration was spread within the 4<sup>th</sup> to the 24<sup>th</sup> November 2019. There were areas that an extended cut-off date on 8<sup>th</sup> December, 2019 was imposed to allow for logistics. This involved covering local and expatriate households even if reported as not being enumerated or interviewed. Remote areas such as Tikopia, Anuta in Temotu province and Malaita Outer Islands have unreliable shipping services, thus enumeration depended entirely on availability of Shipping.

It was challenging during enumeration that the size of EAs' were not the same, as some EAs had households clustered together while others had households scattered across and overlapped with other EAs etc. Therefore, the EAs with scattered households required the enumerators to spend nights out from his or her usual residence to capture information and this had implications on the workload and the accommodation allowances that were paid. This also led to issues where this was not practical in some areas because enumerators who were engaged were not residents of the EA.

Supervisors, on average, were assigned with five enumerators to monitor as closely as possible during both the 2 rounds of the enumeration visits following the de-factor approach. They were expected to check interview standards, completeness and consistency of the questionnaire. Where information was missing or serious mistakes were noticed, they have to send enumerators back to redo the interviews and pass on the updated information to supervisor for quality control.

To avoid enumeration omission and overlapping, the supervisor had to organize his/her enumerators to settle into their respective EAs and assist them to clearly identify their EA boundaries, noting that the responsible enumerator should visit and enumerate all households in his/her allocated EA. In practice each enumerator was responsible to complete an EA with an approximate workload size of at least average of 40- 60 households estimated to be about 350 people. This was the estimated workload allocated to be covered by the enumerator over a period of two weeks during the first visit.

In some cases, supervisors had to change arrangements based on local conditions such as grouping the enumerators in two or three or the whole team of five enumerators to complete one EA at a time until the workload of the team was completed in the first visit. This was to help the slower and incompetent enumerators. Where possible, the enumerator and the head of the household arranged a mutually convenient time for enumeration to take place during the enumeration period. This was to ensure that the enumerator would minimize repeated visits to the households and that the households would be prepared and available to spend enough time to answer the questions. In addition, timing of the visit to the households especially in urban areas like Honiara was programmed to be after official hours and weekends or in the evenings when the head and the members of the households were present.

The second visit to the households on or after census night on the midnight of the 24<sup>th</sup> of November 2019 was much straightforward compared to the first visit in terms of the workload. Given the logistics, workload and household availability, it was often impossible for an enumerator to visit all the households in an EA on Census night. Hence, the enumeration was

spread over a longer period, both before and after the actual Census night, the cut-off date was 8<sup>th</sup> December 2019 in some areas. The aim was to record the population as if, suddenly, at one minute to midnight, everything came to a complete stop and the population stood still ready to be counted. The reference date best known as the Census night allowed the population to be counted.

## **14.2 Non-Private Dwellings (NPDs) or Institution**

Arrangements to enumerate all NPDs in the country differed from arrangements for private households. There were two questionnaires developed to capture NPDs. Form A or Self filling questionnaires were used to enumerate those residing in Hotels, Motels and Rest House. Instruction was given for NPD enumerators to pack all NPDs questionnaires into official SINSO/Census envelopes and were distributed to these NPDs from the 4<sup>th</sup> of November to 23<sup>rd</sup> of November 2019. Filled in questionnaires were collected by 25<sup>th</sup> of November 2019. For Form B or other NPD such as Boarding Schools, Hospitals and Correctional Institutions, enumerators were to consult responsible NPD authorities before conducting face-to-face interviews after Census night.

## **15.1 Data processing**

It was necessary that the various phases of the data processing were planned and implemented to ensure that the final 2019 Census data was validated and that accurate statistical tables were generated for analysis and reporting. The Census Office and SINSO did not have technical capacity in data processing, especially involving large complex data collections such as a census.

The short-term Data Processing Consultants were recruited from abroad. The Census Office engaged the services of Dr. Michael Levin and his assistant Mr. Jomer Manongsong who were involved in the following: (i) development of the 2019 Census data entry application and data dictionary using CSPro, (ii) development of validation and editing modules such as batch editing to clean up data errors and inconsistencies, (iii) development of selected tabulation modules to generate statistical tables, (iv) production of various topical statistical tables used in the analysis; (v) conducted trainings for Census/SINSO staff.

In regard to data processing trainings, a two week in-depth training from 8-19<sup>th</sup> October 2018 on Census Management and CSPro was conducted by Dr. Michael Levins as a capacity building training for SINSO staff before the actual execution of the 2019 Census. Several zoom meetings were normally organized with the Census Office and Data Processing Consultant to discuss technical issues encountered during the process.

Data processing activities involved census quality checks, coding, data entry and cross checking of data relationships and consistency. Each activity was supervised by census data processing supervisors who were SINSO staff. Overall guidance and advice was done by the Assistant Census Data Processing Consultant Mr. Jomer Manongsong. The Economics Unit of

the SINSO were responsible for training and overseeing the census coding team regarding inputs using the International Standard Classification of Occupation (ISCO) codes and International Standard Industrial Classification (ISIC) codes.

A total of 159 quality checkers, coders and data entry were contracted. Important data quality trainings and instructions were emphasized in all respective data processing activities to ensure completeness, accuracy and consistency of data recording.

The data sets were made available to the Census Commissioner by end of 2022. The SINSO team had to undertake further specific edits on the data on a number of variables relating to labour force and economic activity. In writing further editing of the data on specific variables such as financial inclusions are being undertaken, and once variable quality is assured, then reporting through special monographs will be undertaken and the information released.

One of the major issues relating to data processing was the relationship between the subject matter understating of the questions (variables) and variable-relationships in the questionnaire and the actual processing of the data related to those questions. This often led to some inconsistencies when generating tabulations on specific topics such as school enrollments, labour force and occupations etc. Future censuses processing should consider involving subject matter experts involve data processing experts in the questionnaire design process to ensure data processing was undertaken in line with subject matter considerations.

## **16.1 Data Analysis and Data Dissemination**

The final analysis of the 2019 Census data comprised on two major reports: (i) The 2019 National Population and Housing Census National Report (Vol 1) and (ii) The 2019 National Population and Housing Census National Report (Vol 1). Both this reports were launched by the Minister of Finance and Treasury on the 21 September, 2023.

Immediately after the official launching of the above reports, the Census Office/SINSO undertook dissemination workshops in Honiara and across selected provinces to present key findings and explain certain statistical tables to policy makers and planners, and users (including the wider community and stakeholders) and how they could use the data effectively in every day decision-making.

## **17.1 Key Challenges**

Numerous challenges were encountered by the Census Project Office since the initial planning phase of 2019 Census till field operation phase. These included:

### **I. Technical Assistance & Funding**

Lack of technical support and funding as a major constraint to the 2019 Census preparation, especially when there was limited support from major development partners, UN agencies and regional technical assistance providers. As a result, the Solomon Islands government had to consolidate its own very scarce resources to be the

main donor (93% grant support) to the 2019 Census Project. This was the first time in the Solomon Islands census history where the government had to be the main source of funding for a census.

Despite numerous requests by the SINSO to development partners and donors, the slow and minimal response meant that the SINSO had to find alternative sources of funding by seeking its own government for funding to implement the 2019 Census with very limited technical expertise.

## **II. Recruitment**

There were challenges encountered in the process while recruiting for the Training of Trainers (ToT) and Census field workers. Higher expectations from Census Project Office for SINU to recommend graduate teachers for the ToT was not achieved. The Census Project Office also encountered self-invited candidates who did not apply for fieldwork positions but walked in to attend the Census trainings.

The proposition for recruited field workers to work in their respective EA was not successfully met due to various reasons. One classical example was that the enumerators opted to select EAs of their choice even if those EAs were outside of their local places of residence. This often resulted in various financial claims, especially for accommodations and related field costs.

Following the government recruitment process took a lot of time. Hence, the Census Project Office had to initiate various actions such as travelling to the provinces and local areas to encourage recruitment of local workers and also scrutinize potential candidates to encourage them to apply formally and comply with government requirements (e.g., providing medical reports and police clearance reports).

## **III. No online survey designed questionnaires for 2019 Census.**

It is so difficult to capture some expatriates residing in the country due to the 2019 Census questionnaires was not designed for online responses. Manual Census questionnaires were sent via email by the Census Project Office but response rate is very low.

Most expatriates and their families were covered under diplomatic immunity and certain security privileges and thus this make it very difficult to clearly distinguish between resident expatriates (who resided in the country for 12 months or more) and diplomatic workers in the country.

## **IV. Financial Claims**

There were numerous claims sent to the Census Project Office seeking reimbursement of costs incurred in various census operations. To justify the claims was a major challenge for the Census Project Office. A lot of bogus claim were also received thus

this distorted genuine claims. Service providers could not be contacted to provide justification for their claims and most claims were raised by supervisors and area managers under their names hoping that payment will pay through them.

#### **V. Impact of Covid-19 Pandemic**

The Census Project Office staff were severely impacted during late 2019 to 2020 due to adhoc closures of the office HQ, and staff who caught the disease had to be laid off work. Government funding support was reduced as funding was diverted to deal with the pandemic. The key operations that were delayed was data processing. This delay also delayed the data analysis and release of the census results.

#### **VI. Impact of the Honiara Riots in November 2022**

The Census Project Office operations and staff were also affected during Honiara riots in November 2021 as the SINSO Office that houses the Census Project Office was stoned and windows were broken and staff threatened. This also caused delays in progressing the finalization of data processing work. This delay also impacted on progressing data analysis and the release of the census results.

### **18.1 Way forward**

A continuous partnership with donor partners, regional and United Nations bodies need to be strengthened. For upcoming surveys such as the proposed 2024/2025 Household Income and Expenditure Survey (HIES) and 2026/27 Demographic Health Survey (DHS), SINSO strongly recommend that development partners work with SINSO in providing support in areas such as technical expertise and grant funding support to enable the successful implementation of these forth coming surveys and censuses. Key areas of technical support needed by the SINSO include data processing, sampling, and complex data analysis.

A clear recruitment guideline should be formulated by SINSO to strictly ensure that recruitment for all census and surveys are undertaken within expectations. For instance, it is advisable to recruit Census field workers in their respective EAs and that recruitment of ToT include graduate teachers, many of whom are still waiting for employment and equally represent the ten provinces in our country. Moreover, SINSO must engage with SINU under some agreement to ensure SINU supports future ToT persons to assist in future trainings of enumerators and supervisors.

To ensure that the census results are widely disseminated, a census dissemination strategic plan was developed and put in place. The dissemination strategy would include National and provincial dissemination plan. Disseminating Census information using Screen display, online dissemination tools including SINSO websites, SIG media release, Newspapers and broadcast media, workshops are relevant dissemination method to use.

## GLOSSARY

<b>Indicator</b>	<b>Definition</b>
Census	“A canvass of a given area, resulting in an enumeration of the entire population and the compilation of demographic, social and economic information pertaining to that population at a specific time”. This specific point in time is referred to as the <b>census night</b> .
De facto census	This means that persons are to be enumerated in the household where they spend the night
Economic activity	The main activity each person aged 15 years and older did during the reference week.
Economically active	Comprises of those who were either engaged in a full or part-time job or in a business, engaged mainly in farming, fishing or handicrafts making, or mainly in housework with some farming, fishing or making handicrafts, who had a job but was on leave or temporary absent for some reason, and the unemployed.
Household Head	The head of the household is the person who is regarded by its members as the head.
Household	Those persons who usually eat together and share the work of preparing the food and/or the cost of work of providing it”.
Household head	The person with the primary authority and responsibility for household affairs. This person is usually designated by the members of the household.
Industry	Records the main activity undertaken by the establishment or place where a person worked. Industry affiliation was classified according to the International Standard Industry Classification (ISIC) 1990 Revision 4_2004.
NPD	An Institution, for census purposes, may be defined as an organization providing specified services or performing some

general public function for a group of residents or inmates who will normally be unrelated to each other

NSDS	The National Statistics Development Strategy is a framework aimed at rebuilding statistical capacity and strengthening coordination across the agencies responsible for producing statistics
Literacy	Is measured as a respondents' ability to read and write a simple sentence in Pidgin or in English or both.
Not economically active	Persons who were neither employed nor unemployed. These included those engaged in housework only, full time students, the retired and the disabled.
Paid work	Refers to the work a person completes in order to gain wages, salaries or cash.
Place of Birth	This refers to the village a person was born. Where a mother travels to another area, say to a hospital, or another country to give birth, the village or country in which she usually resided at the time she gives birth, is that child's place of birth.
Place of Usual Residence	The geographic place where the enumerated person (a) has lived for the past six months or more, or (b) having arrived in that geographic area during the last six months and intends to stay there for 6 months.
Remittances	Money sent to the household from friends or relatives living overseas or within Solomon Islands.
Unpaid work the	Refers to any work a person voluntarily did whether it be for family, church or community, or any other related organization and for which no compensation was paid.
Urban population	Total population of the localities defined under the umbrella of urban localities and or boundaries. There were special cases under which people residing in localities within rural boundaries that are just adjacent to urban localities are also defined as urban areas let alone the people. A good example is the outskirts of Honiara City where people are increasingly residing outside urban peripheries.
Unemployed	Those that 'did not work in the previous week (other than those who had a job but were not at work during the reference week), but 'spent sometime looking for work', and 'were available to work if a job was offered to them.

## Village

A village is usually defined as a group of dwellings who usually do things together, have one village head such as a village chief and have a common place such as *church* where the people usually meet and do other things in a communal manner
